Backend
Python

Database
SQL

Framwork
Django

Projects

linkedin
The Dummy LinkedIn project is a basic web application built with HTML, CSS, Bootstrap 5, and JavaScript for the frontend. The backend is powered by Python using the Django framework. The project features a simple navigation bar with Home, Profile, Connections, and an added Internship Project page.
This is a simplified representation and does not cover all features of a real LinkedIn application.

Extra-curricular Activities

Nss
Actively participated in various community service initiatives, where I applied my skills to address real-world challenges. Engaging in community projects not only allowed me to give back to society but also honed my teamwork, leadership, and problem-solving abilities.

Achievements

During my college tenure, I actively participated in various community service initiatives, demonstrating a strong commitment to social impact. Notably, I spearheaded a campaign addressing homelessness, collaborating with local organizations and mobilizing a team of fellow students. Our efforts resulted in impactful outreach programs, providing essential supplies and support to individuals in need.
